

Nanoleaf's 'Touch Actions' Will Magically Turn Your Lights into Smart Buttons

Nanoleaf's new HomeKit 'Touch Actions' upgrades your Canvas light squares into smart buttons for your entire home. With as little as a single press on a square, activate HomeKit Scenes to control any or all of your HomeKit products at once. Eliminate extra steps of unlocking, swiping and tapping into your phone's app. Now you can create magic across your devices for entertaining, relaxing or hanging out - simply by tapping a Canvas square in your layout.

The Easiest Smart Controls, Ever

Nanoleaf's Touch Actions take wireless control to a new level of freedom, making your smart home commands more accessible than ever before. You're using your phone to message friends before they come over tonight, and you still need to order food, drinks and clean up, well, everything. At least one thing's already taken care of. A simple tap on your designated 'Party' Canvas square can instantly set the right mood without any extra work.

With Touch Actions, a single press can transform your entire space. Set your Canvas lights to an energetic Rhythm Scene that dances along to your favorite song. Dim the rest of the lights in your home for the perfect ambience. You can also turn on your oil diffuser to create an inviting stress-free oasis as a final touch. With HomeKit-enabled smart plugs, you can even include non-connected devices in your smart home controls.

Single Press, Endless Possibilities

Each Canvas square can be customized for a different occasion, activity or time of day. The square that's closest to you as you walk into the kitchen each morning? Set that as your 'Good Morning' square to turn on your kettle, turn on the lights and turn down your thermostat to save energy while you're out of the house. You get to decide which square does exactly what.

Once you've decided on the square for each Scene, simply choose an action - single press, double press or long press to set the Scene. It's that easy.
