Meet Nanoleaf Elements

Nanoleaf Elements
infuses **smart
technology with
lighting design.**

Customizable modular panels finished with a wood-grain veneer provide elegance and cutting-edge innovation to your living space. **Made to look beautiful on or off,** Nanoleaf Elements is a smart lighting fixture and standalone piece of wall art all in one. A wide range of warm to cool lighting options **create calming nature-inspired Scenes like a crackling Fireplace and gently moving Clouds,** setting the ambience for unwinding before bed or getting cozy in your favorite reading nook.

Nanoleaf Elements

What Truly Sets Nanoleaf Elements Apart

Corner Control

Enables each corner of the Hexagon to light up independently, creating surreal organic motions like ember's glowing in a fire or gently moving clouds. You can also paint each corner an individual color temperature or turn one off for an even more dynamic effect.

Back Lit

Each Hexagon panel emits a glow from the back for a double-lit effect that makes your layout look like it's truly come alive.

Dynamic Glowing Effects

From the cozy ambience of a crackling Fireplace to the relaxation of Calming Waterfalls, Elements comes with 11 unique Scenes (or create your own in our app) to set the ideal mood. With hundreds more Scenes available for download in the Discover tab of the app.

Elegant and Smart

A blend of technology and design, Elements was made to look beautiful on or off. The panels double as wall art with its organic textures that make your home feel more welcoming.

What Inspired Nanoleaf Elements?

Our goal is to allow our customers to bring the best parts of the natural elements indoors, creating comforting experiences that can only be found when we're immersed in nature. Like a cozy campfire on a summer night, the slowly moving clouds on a sunny day and the warm waves of a tropical beach. Things that naturally instill a sense of peace and calm within us.

As a smart technology company with design as a core driver of our product philosophy,

we also wanted to break the barrier between smart technology and elegant design. Most smart products have been made to only focus on functionality and not how it fits into a home. We're here to change that.

Nanoleaf Elements brings together the worlds of smart technology and thoughtful design, without sacrificing artistry or innovation.

Who Is It For?

We designed Nanoleaf Elements specifically for people...

- Creating a smart home ecosystem, who are also looking for products that will add to their home's decor.
- Looking for ways to elevate their home in an elegant way, without sacrificing smart controls and automations.
- Living in smaller spaces that need both decor and lighting at the same time, and are looking for an option to eliminate the need of extra accent lighting to save space and money.
- Looking to create an area within their home as their personal oasis or getaway so they can use that space to relax, unwind and get away from their daily stressors.
- Who love to get creative and hands-on with designing new styles for their home. Use our Layout Assistant to create and preview your design before setting it up on the wall.

Retail Information

\$299.99 USD

Smarter Features

Schedules

Automate your lighting to wake you up in the morning, wind down at night and set reminder alarms.

Touch Controls

Touch a panel to turn on/off, change Scenes and adjust brightness.

Discover Community

Explore thousands of new Scenes or upload your own creations.

Product Kit
Nanoleaf Elements

Thread-Enabled

Elements Controllers work as Thread Border Routers to support Thread-enabled products, like Essentials Bulbs and Lightstrips.

Circadian Lighting

Matches the color temperature of your lights with sunlight to rebalance your body's natural rhythms.

Music Visualiser

Watch your favorite songs come to life in real-time as the lights sway along to melodies and beats.

Layout Assistant

Create a design and preview on your wall with AR Technology.
