

Nanoleaf Launches New Skylight Modular Ceiling Light Panels, the First of its Kind Ceiling Fixture Transforming Your Indoor Lighting Experience

Toronto, ON - Nanoleaf, the global pioneer in smart lighting design & innovation, is thrilled to announce its latest product is available for pre-order—Nanoleaf Skylight Modular Ceiling Light Panels—the first of its kind ceiling fixture offering full design customizations. Skylight breaks away from traditional ceiling light solutions and uniquely blends functional everyday lighting with creativity and personal expression, highlighting Nanoleaf's continued commitment to fusing elevated design with technology and to always rethink what's possible.

Paint an Expansive Open Air Sky in Your Home

Nanoleaf Skylight revolutionizes smart ceiling fixtures by creating the beauty of an open-air "sky" experience for your living and working spaces. With remote work as the new norm for many, we're spending more time in our homes than ever before, which can have negative impacts on our mood and energy levels—with Skylight, create more optimal spaces that are bright (1400 lumens per panel) and evenly illuminated with crisp whites (2700-6500K color temperature range) and 16M+ vibrant colors, transforming homes to feel more open and refreshed.

Skylight features a flush-mounted modular square design with diffused multi-point lighting, creating a soft and natural lighting experience that brings the beauty of nature inside. Seamlessly adjust colors and Scenes like "Gentle Rain" or "Sun Shower" to set the ideal ambience for morning to evening routines in the bedroom or focus time in office spaces. With Schedules, wake up to a gentle sunrise Scene filled with soft oranges and pinks to help energize you in the mornings, and ease yourself to sleep as you lay under a glimmering star effect when winding down for the evening. As an added security measure, users can remotely control Skylight or set the lights to automatically turn on and off at desired times to keep your home safe while away.

Design Your Own Ceiling Fixture

Hard-wire one square, and then add up to 100 additional squares across your ceiling, with the freedom to create your own designs using the modular set up. For the first time ever, users can extend their ceiling fixture into hard to reach spaces that were previously impossible to illuminate. Each square emits 1400 lumens of light with a lifespan of 25,000 hours.

Built with Nanoleaf's full suite of smart features, Skylight includes the Rhythm Music Visualizer, Schedules, Magic Scenes, RGBW color options, and much more. Control Skylight with the Nanoleaf App via Wi-Fi, with your preferred smart home ecosystem, or with your traditional lightswitch.

Nanoleaf Skylight is now available for pre-order at go.nanoleaf.me and retails for \$249.99 USD for the Smarter Kit (3PK) and \$69.99 USD for Expansion Packs (1PK). Product will ship late January 2024.

About Nanoleaf

Nanoleaf is a technology and IoT company changing the world with the most innovative smart home solutions, taking ordinary experiences and making them extraordinary. By infusing thoughtful design and technological intelligence in their products, Nanoleaf is ushering in a new era of the smart home that centers around complete personalization – a world without restrictions that embraces the highest potential of our most loved spaces.

Nanoleaf was founded in 2012 by three engineers wanting to shake up the lighting industry. The company now has a global presence with offices in Shenzhen, Paris and Toronto. Made up of a diverse team of passionate out-of-the-box thinking problem-solvers, Nanoleaf strives to transform and reshape the way we experience our world.
