

Nanoleaf Canvas

Light Squares Smarter Kit

Welcome to your Reviewer Kit packed with all the important information to give you the best Canvas lighting experience.

Our Inspiration

Creating products that instill joy & happiness in its users, Nanoleaf has always believed in nature as its most powerful source of inspiration. The Nanoleaf Light Panels & Rhythm were inspired by the Northern Lights, capturing the unrivaled enchantment of color and light from the natural phenomenon. Now comes the Nanoleaf Canvas Light Squares: a light so intuitive, fluid and personal - you can't help but marvel at its beauty and innate reflection of nature's surroundings.

Touch to send soft ripples of a Koi pond scene across the Canvas squares. Touch again to transform your space into a party-ready room as the Canvas squares turn into a music visualizer for your wall. Touch to transform your light wall yet Again, this time into a relaxing Scene colored in with the shades of a brilliant setting sun.

With the Canvas squares, we're moving even closer to our goal of completely freeing light not only from the fixture, but from a predefined notion of what lighting needs to be. The Canvas squares are completely personalized to you, shaping and shifting to fit into each of the moments that fill your day.

Key Benefits

Intuitive Touch Control

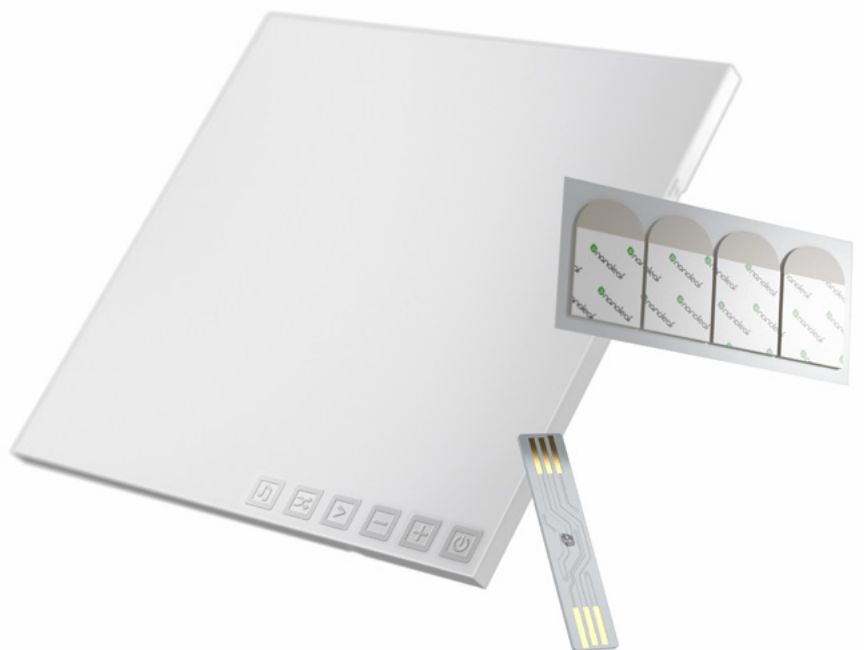

Smart controls, even without your phone. Transform your entire space with one single touch. App, voice and manual control also available - how you control your Canvas squares is totally up to you.

Modular Freedom

The Canvas squares are like LEGO for lighting so you can design, shape and reconfigure to your heart's desire. With its unique staggered linker system, you can create uniform designs or abstract asymmetrical ones.

1000s of Scenes, Right out of the Box

Discover new Scenes with the control square's 'Shuffle' Button. Download your favorites or check the App for even more design inspiration.

Smarter Kit Features

Touch Games

Play classic games like Whack-A-Mole and Memory right on your Canvas squares layout. Download in the 'Discover' tab to tap and compete with friends.

Edge to Edge

Modern meets classic with the Canvas squares' seamless edge to edge design combined with its multi-faceted textured face.

500 Light Squares

Imagine an entire wall made of light. Connect up to 500 light squares on one single control square. Truly immersive, redefined.

Music Visualizer

With music sync built right into the Canvas squares, all you have to do is hit play on your favorite songs and watch as the sounds are transformed into dancing symphonies of color and light.

Control, Your Way

How you control your lights is completely up to you: Advanced customizations in App, voice commands, manual control square, Nanoleaf Remote. Use IFTTT for even more customizations.

Community

Curate Rhythm Scenes to fit your life. Publish and share Scenes you've created, vote for your favorites and create playlists to fit each mood and occasion.

What's Inside

The Accessories

Remote

12 different sides for your personal customizations. Flip to change animations and turn to adjust brightness. It's that easy. The Bluetooth-enabled HomeKit remote can also sync up with 3rd party HomeKit products.

\$49.99 US | \$59.99 CAD

Mounting Kit

The Mounting Grid is mounted to the wall using screws, then the Canvas squares simply snap into place. No linkers are needed when installing with the Mounting Grid. This is best used for professional installations and ceiling displays.

Early 2019 Release

Tips for Photos/Videos

Dim Your Lights

The Canvas squares look amazing at full brightness, but this often doesn't translate well on camera. To best capture the color of the lights, dim them down to about half brightness.

How to Dim Your Lights

Controller — Hold down the Dim (-) button on the controller to manually dim down the lights.

App — Go into the Dashboard and control brightness using the slider.

Voice — Say "set my lights to 50% brightness" to magically adjust. Works with Apple HomeKit, Google Assistant and Amazon Alexa.

AR for Your Design

Use the 'Layout Assistant' on the Nanoleaf App to see how your light squares would look on your wall before installing them.
