

Nanoleaf Reveals New Advanced Music Visualizer Software, Three Matter-Compatible Smart Lights and the Highly Anticipated Launch of Skylight

Toronto, ON – Nanoleaf, the global leader in smart lighting innovation and design, is excited to announce new color & lighting experiences for your entire home—transforming the way you live in both your indoor and outdoor spaces from floor to ceiling. Nanoleaf’s new Orchestrator software, Essentials Matter Smart Multicolor Lightstrip (Indoor), Outdoor String Lights and Permanent Outdoor Lights will be shown for the first time at CES 2024, enhancing your musical experiences, entertainment areas, and day-to-day smart home automations. The company is also announcing the pre-order launch for the highly anticipated Skylight Modular Ceiling Light.

Nanoleaf Orchestrator Takes Music Reaction Beyond the Beat

Nanoleaf’s new Orchestrator software transforms your experience with music like never before, creating captivating color & light shows with unmatched real-time music analysis and beat detection. Unlike existing music visualizers today which merely pick up on any audio or sound within a space, Orchestrator connects directly with your computer’s sound source and isolates the response to your device for the most accurate real-time audio visual experience. The result is dynamic light shows perfectly synchronized and designed for each of your personal playlists and favorite songs.

While Nanoleaf’s current Rhythm feature reacts to sound, the new Orchestrator technology intelligently responds to your music. With Nanoleaf’s advanced “Smarter” Technology, Orchestrator picks up on beats, melodies, and audio spectrum to generate mesmerizing visuals with unparalleled precision and automatically curates every aspect of your musical lightshow. Watch as energetic beats are brought to life with pulsating light reactions, while slower more melodic songs gently dance across your wall with synchronized animations. Users can also choose to create the light shows themselves by customizing their own unique palettes, effects and more.

Orchestrator works via the Nanoleaf Desktop App and is compatible with any music streaming platform or audio player. Orchestrator is planned for a Spring 2024 release.

Light Up Your Essential Outdoor Spaces with Matter

Continuing to lead the way for Matter's growing ecosystem of products, Nanoleaf is announcing three new color-changing addressable smart lights to work with Matter: a Smart Multicolor Lightstrip (Indoor), Smart Multicolor Outdoor String Lights and Smart Multicolor Permanent Outdoor Lights. The new outdoor additions to the Essentials Matter line mark the company's first ever outdoor lighting products, bringing the magic of dynamic gradients and warm ambience to your home's exterior spaces, lighting up patio areas, backyards and gardens all year round.

Built with Nanoleaf's exclusive technology, the new smart addressable lighting additions to the Essentials line seamlessly integrate with all of your other Nanoleaf products for simple controls and smart customizations, elevating your everyday smart lighting experiences. Group products together to set Schedules for easy automations with Matter hubs, and paint your own animations with multiple colors appearing all at once along your lights for a stunning gradient effect. The lights will also come with a new collection of preset lighting Scenes, along with access to thousands of additional Scenes in the Nanoleaf App.

The Nanoleaf Essentials Matter line allows for simple control via Matter, or directly with the Nanoleaf App through Wi-Fi or Bluetooth. Users also have the option to control their lights with voice control or the easy access Manual Controller, for times when they prefer to go without their device.

The new Nanoleaf Essential Matter devices are planned for a Spring 2024 release.

Skylight Smart Modular Ceiling Light Now Available for Pre-Order

First previewed at CES 2023 and winning 8 "Best of CES" awards for product design and innovation, Nanoleaf is excited to announce the official launch of Skylight, introducing the world to the first ever smart modular ceiling light panels with full design customizations. Breaking away from traditional ceiling light solutions, Skylight uniquely blends functional everyday lighting with creativity and personal expression, highlighting Nanoleaf's continued commitment to fusing elevated design with technology, and to always rethinking what's possible.

Skylight features a flush-mounted modular square design with diffused multi-point lighting, creating a soft and natural lighting experience that brings the beauty of nature inside. Seamlessly adjust colors and Scenes like "Gentle Rain" or "Sun Shower" to set the ideal ambience for morning to evening routines in the bedroom or focus time in office spaces. With Schedules, wake up to a gentle sunrise Scene filled with soft oranges and pinks to help energize you in the mornings, and ease yourself to sleep as you lay under a glimmering star effect when winding down for the evening. Users can even control Skylight remotely for an added security measure when away from home, or set a Schedule for automatic on/off at desired times.

Hard-wire one square, and then add up to 100 additional squares across your ceiling, with the freedom to create your own designs using the modular set up. For the first time ever, users can extend their ceiling fixture into hard to reach spaces that were previously impossible to illuminate. Each square emits 1400 lumens of light with a lifespan of 25,000 hours. Built with Nanoleaf's full suite of smart features, Skylight includes the Rhythm Music Visualizer, Schedules, Magic Scenes, RGBW color options, and much more. Control Skylight with the Nanoleaf App via Wi-Fi, with your preferred smart home ecosystem, or with your traditional lightswitch.

Nanoleaf Skylight is now available for pre-order at go.nanoleaf.me and retails for \$249.99 USD for the Smarter Kit (3PK) and \$69.99 USD for Expansion Packs (1PK). Product will ship late January 2024.

About Nanoleaf

Nanoleaf is a technology and IoT company changing the world with the most innovative smart home solutions, taking ordinary experiences and making them extraordinary. By infusing thoughtful design and technological intelligence in their products, Nanoleaf is ushering in a new era of the smart home that centers around complete personalization – a world without restrictions that embraces the highest potential of our most loved spaces.

Nanoleaf was founded in 2012 by three engineers wanting to shake up the lighting industry. The company now has a global presence with offices in Shenzhen, Paris and Toronto. Made up of a diverse team of passionate out-of-the-box thinking problem-solvers, Nanoleaf strives to transform and reshape the way we experience our world.
