

## Nanoleaf's Latest Creation Transforms Sound into Psychedelic Displays of Light

The Nanoleaf Rhythm is here to combine vision and sound into a fully immersive music experience. The Rhythm is an add-on sound module that transforms the best-selling Nanoleaf Light Panels into a real-time music visualizer.

### Enchanting Interpretations of Music

The Rhythm makes it possible to see sound, visually remastering your music into dancing symphonies of color and light. Released last year, the modular Nanoleaf Light Panels changed the way the world experiences light. Now, the Rhythm adds another dimension to the Nanoleaf journey: bringing your playlist to life before your eyes, delighting our senses and revolutionizing the way we perceive music. With gorgeous color displays created by your own soundtrack, the Rhythm takes you on a sensory adventure that's personalized just for you.

### Plug and Press Play

The Rhythm is a small sound module that plugs into any Light Panel. Its built-in audio sensor automatically picks up on beats, sounds, and melodies, translating the sounds into melodic light shows. Full customization of Scenes (animations) can be made in the Nanoleaf App. Share,

download and vote for thousands of your favorite scenes right in the 'Discover' section of the new App.

Each Rhythm Scene reacts to sound in a different way, and will work with varying genres of music from Pop to Classical and R&B to EDM. Control your Light Panels & Rhythm in three ways: using the App, your voice (Siri, Amazon Alexa, Google Assistant), or manually toggle with the physical button on the Rhythm Module.

### **For Those who Dream in Color**

The Nanoleaf Light Panels are inspired by the innate need for individual self-expression. Made up of triangular LED panels, both RGBW color-changing and tunable white, the fully customizable Light Panels create the perfect ambience in any space. Featuring as many colors as there are people in New York City, the Light Panels can be painted into the colors of the rainbow, waters of the Caribbean and everything in between—the possibilities are only limited by one's imagination.

The Light Panels have a single power supply that controls up to 30 panels with WiFi, while the linker pieces connect the Light Panels together like LEGO. Secure the Light Panels to any smooth flat surface with the Mounting Kit. Double sided mounting tape is also available for setups that require minimal damage.

### **Fully Immersive Experience of Sound**

"Adding the Rhythm music visualizer was the natural next step for Nanoleaf," states Gimmy Chu, CEO and Co-Founder of Nanoleaf. "Visuals play an incredible part in how we experience everyday life, but our senses extend so much further than that. With the Rhythm, sight and sound can now come together, creating a fully immersive sensory experience for pushing the limits of self-expression."
